CS 321 – Software Requirements and Design Modeling

Fall 2019

Assignment 5 – Testing

Due date: November 26, 2019, 11:55 pm

Deliverables:

1. **Test plan [10 points]**
   Discuss how your team planned to test the system that you are building. How did your team incorporate testing in your development process? Provide details of the different testing techniques that your team has applied.

2. **Technology used [5 points]**
   Briefly discuss the technology that you have used to facilitate testing.

3. **Descriptions of the files [10 points]**
   List all the test files that your team has worked on and briefly discuss the purpose of each file and who worked on it.

   If multiple people have worked on one file, document the % of contribution of each member with respect to that file.

   Share your version control project repository with the GTA (ensure that the test files are included). If you are enrolled in section 001 or 004, please share it with Bhargavi. If you are enrolled in section 002 or 005, please share it with Roberto. Their email addresses are listed on Piazza.

4. **User Testing [25 points]**
   Request external users to test your system. Describe how many users tested the system, the process followed, test script used, and feedback obtained.

Submission Instructions

The assignment should be submitted as a .pdf file before the due date – November 26, 2019 at 11:55 pm. Make sure the name of the file includes the assignment number and your last names CS321-P5-<LastName1>-<LastName2>-< LastName3>-< LastName4>.
